

Continuation of Substance of Interview including description of the general nature of what was discussed: The examiner, on 06-26-2009, wanted to see clarification of the game session information, first wager information, gaming information, and gaming code. This was done by the applicants' proposed amendments citing the first wager information including a first wager amount, receiving gaming information including data representing an outcome, and executing code at the gaming device in which the gaming information is used to present an outcome to a player; this was done for all the independent claims. The examiner also wanted clm. 65, receiving the gaming outcome, and clm. 67, receiving periodic activation information, in independent form, as they seemed the most significant in light of '640. Mr. Glade had faxed proposed amendments along these lines on 06-29-2009. The examiner requested permission to change the proposed amendments to provide antecedent basis for "a first remote gaming server" from "the first remote gaming server" and change "personal gaming device" to "portable gaming device" to be more consistent for independent claims 45, 77, and 82. Mr. Glade sent a return fax on 06-30-2009 authorizing these minor changes to the proposed amendments.
